**Rating Rationale**

The rating assigned to the bank facilities of Lottotech Ltd ("Lottotech") derives strength from established and strong market position of the company in the National Lottery segment, tracks record of successful varied business operations of the Gamma group, experienced and resourceful promoters, professional and experienced management team at Lottotech, reasonably priced Loto ticket (MUR 20) and high participation rate of more than 65% of the adult population in Mauritius. The rating also draws comfort from the long-term operating licence by the Government of Mauritius (GoM) until 2029 which covers the tenure of the loan and strong financial performance during FY22 with healthy growth in total operating income, profitability and comfortable debt coverage indicators.

The rating is, however, constrained by high regulatory risk, high dividend pay-out ratio leading to low networth and risk associated with execution of proposed capex.

- Ability to improve profitability and retain excess cash in the company.
- Diversification of revenue stream with new games

**Negative factors that could, individually or collectively, lead to positive rating action/upgrade:**

- Reduction in Participation rate below 50%
