**Rating rationale**

The ratings assigned to the bank facilities of Omnicane Milling Operations Limited ("**OMOL**") continue to derive strength from strong track record and experienced promoters of Omnicane Group in the sugar industry, strategic location of the plant in a zone with sufficient cane availability, improved recovery rate during FY24, strong financial profile of the off takers, advantage of being the sole refiner in Mauritius, stable bagasse remuneration, inhouse logistics & energy support helping the company in smooth operations and higher sugar premium for White Refined Sugar (WRS). The rating also factors in the stable operational & financial performance with moderate gearing and healthy coverage ratios, and stable global demand for sugar.

The rating is, however, constrained by OMOL's exposure to regulatory risk, declining trend of sugarcane availability and harvesting acreage, exposure to price fluctuation with commodity nature of sugar, industry exposed to climatic risks and foreign exchange risk.

**Rating Sensitivities**

**Positive factors that could, individually or collectively, lead to positive rating action/upgrade:**

- Improvement in operational and financial performance of OMOL.
- Ability to sell the Land Conversion rights as envisaged over the stipulated timeline.

**Negative factors that could, individually or collectively, lead to negative rating action/downgrade:**

- Reduction in the availability of sugarcane weaking operational and financial performance.
- Significantly additional debt by OMOL leading to overall gearing above 1x.
- Financial support to group companies impairing debt repayment capacity of OMOL.

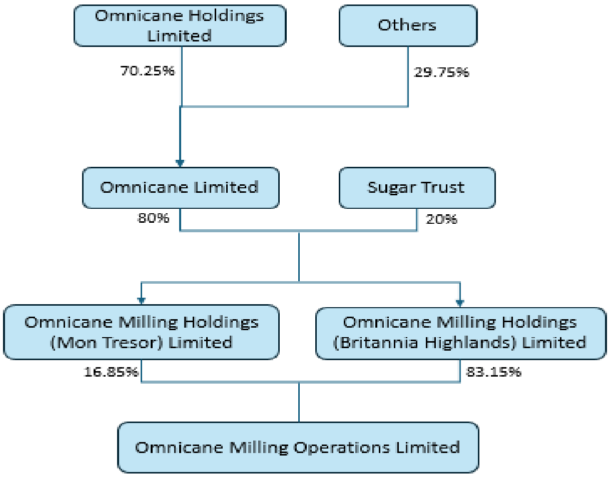
**BACKGROUND**

Omnicane Milling Operations Ltd was incorporated in November 2008 by the Omnicane Group, to take over the sugar milling factory of the Omnicane group at La Baraque. Over the years, the factory has been modernized and expanded, with a current annual crushing capacity of 1.4 million tons of sugarcane. In 2020, as per the new agreement in order to bring economies of scale, it was agreed that only OMOL will be doing refining of sugar while Alteo and Terra (other 2 sugar operators of the island) will produce special sugars.

Presently, OMOL's principal activities involve sugarcane milling and refining raw sugar to white refined sugar. It also produces by-products such as Bagasse and Molasses which it supplies to associate companies, Omnicane Thermal Energy Operations (La Baraque) Limited (CARE MAU A-; Stable/CARE MAU A2+) and Omnicane Ethanol Production Ltd (CARE MAU A-; Stable/CARE MAU A2+).



**Operation & Capacity:** OMOL has a crushing capacity of 8,500 tons per day and operates for 5-6 months i.e. July-December. It has an annual production capacity of 400,000 tons of bagasse and 45,000 tons of molasses. The refinery at OMOL can produce 260,000 tons of white refined sugar. In FY24, OMOL crushed 725,377 tons of cane (821,332 tons of cane for FY23) and produced 196,107 tons of refined sugar (196,151 in FY23).

**Comfortable financial performance with low gearing and healthy coverage ratios**

During FY24, OMOL recorded a marginal decline in revenue by 5% to MUR 1,512 million (FY23: MUR 1,586 million) due to reduced cane crushed (725,377 tons from 821,332 tons in FY23). EBITDA for FY24 stood at MUR 390 million, impacted by rising transport, energy, and employee costs. Accordingly, PAT was lower by 31% to MUR 289 million (FY23: MUR 418 million).

In FY24, OMOL's equity shares were reduced from MUR 3,484 million to MUR 1,088 million resulting in a lower tangible net worth from MUR 2,064 million in FY23 to MUR 1,572 million in FY24. Consequently, as of December 31, 2024, OMOL's gearing ratio worsened slightly to 0.30x (0.24x as on December 31, 2023). Interest coverage ratio was lower at 5.52x (from 12.34x in FY23).

**Land Conversion Rights (LCR):** In FY24, there were no sales of LCR, and the company holds LCR for 541 arpents. According to the valuation report as of December 31, 2024, the Omnicane group holds LCR for 965 arpents of land, with each valued at MUR 1.05 million and total fair value of MUR 1,013 million. Hence, OMOL treated the same as an exceptional gain of MUR 88 million in profit and loss for the year ended December 31, 2024.
