

Notching by Factoring Linkages with the Government

[Issued in January 2025]

Background

The credit risk assessment of entities supported in various ways by the government would capture the linkages with the government. Public Sector Entities (PSEs) and/or entities majorly held by PSEs may receive support from the governments depending upon their status, role and strategic importance. The analysis of linkages with the government would be applied as a building block on top of the individual credit risk assessment and will result in a rating which is notched up vis-à-vis the entity's standalone rating based on track record, probability and extent of support that the government provides them. This paper aims to provide an insight on the effect of these linkages and the extent of notch up based on strength of the linkages, on the standalone rating of an entity.

CareEdge Africa (CRAF) takes a view on the strength of linkages by assessing the following factors:

- **Economic and strategic importance of the entity to the government**
 - Extent of ownership and control of the government
 - Policy function served through the entity
- **Demonstrated track record of support by the government**
 - Instances of timely support in the past
- **Legal or moral obligation of the government to support the entity**
 - Guarantees, Letters of Comfort, undertakings, etc. given by the government. Please refer to CRAFs' website (www.careratingsafrica.com) for the methodology on 'Rating Credit Enhanced Debt' for more details on this aspect.
 - Probable impact of default of the entity on the sector

The above factors are elaborated below:

a) Economic and strategic importance of the entity to the government

- **Extent of ownership and control of the government:** The economic and strategic importance of an entity to the government is assessed by the extent of ownership/control of the government in the operations of the entity. Government entities operating in sectors of significant economic and strategic importance would also be exhibiting strong linkages.
- **Policy function served through the entity:** There are government entities established with a mandate to take forward certain socio-economic policies of the government like infrastructure development or providing finance to strategically important sectors, etc. These entities operate as extended arms of the government and the government is expected to provide the required support to these entities to take forward these socio-economic objectives. CRAF takes into account the strategic importance of these objectives to the government while assessing these entities. It is expected that the government would support such entities in times of distress in view of the strategic importance of the socio-economic objectives.

b) Demonstrated track record of support by the government

The demonstrated track record of the government in extending support to the PSEs in the past underlines the government's willingness to extend support. Explicit financial support by way of budgetary allocations, subsidy payments, facilitation of bank lines or other means of finance, capitalisation, extension of loans, etc., highlights the government's stance towards supporting the PSEs.

c) Legal or moral obligation of the government to support the entity

- a. **Guarantees/Letters of comfort from the government:** The government's commitment to the entity is further strengthened if there is explicit support extended in the form of legally enforceable arrangements like unconditional and irrevocable guarantees, undertakings, structured payment mechanisms, etc. An unconditional and irrevocable guarantee given by the government to the lenders of the PSE works on the principle of credit substitution and the rating of the PSE is equated to the rating of the government. Further, the support can also be demonstrated through arrangements like letters of comfort provided by the government which entail a moral obligation on the government. Presence of such arrangements further emphasizes the strength of the linkages, and the rating of the PSE is notched up appropriately depending on the strength of the stated support. The ratings in these cases are suffixed with the symbol "SO" (Structured Obligation) which denotes comfort derived from an explicit external credit enhancement to notch up the rating. Further details about the approach on external credit enhancements can be accessed in CRAFs' methodology on 'Rating credit enhanced debt' on our website: www.careratingsafrica.com
- b. **Probable impact of default of the entity on the sector:** Public sector entities belonging to certain sectors like banks/Non-Banking Financial Institutions are systemically important and a default by any of these entities may have a spiral effect on the financial markets. It is thus expected that the government will support these entities in times of distress.

Extent of notch up

CRAF notches up the rating of the PSE depending on the extent and strength of linkage as explained above. If the linkages are assessed to be very strong due to strategic importance of the entity to the government, the government's demonstrated track record to support the PSE or legal or moral obligation of the government to support the PSE, the standalone rating of the PSE can be notched up by multiple notches. The rating of government entities which are of significant strategic importance to the centre may be equated with the sovereign ('CARE MAU AAA') rating. In case, the extent of linkage is assessed to be moderate, the rating of the PSE after notching up will be somewhere between the standalone rating of the PSE and the rating of the government. A commercial entity not serving any policy functions dedicatedly or not having significant socio-economic objectives, even if majorly owned by the government, would tend to operate largely independently, and may face competition from private players in the segment. Such entities can be found mainly in the manufacturing sector and would exhibit lower integration with the government's policy framework. These entities are generally assessed on the basis of their standalone credit profile without any significant notch up.

About:

CareEdge is a knowledge-based analytical group that aims to provide superior insights based on technology, data analytics and CARE Ratings (Africa) Private Limited (CRAF) is the first credit rating agency to be licensed by the Financial Services Commission of Mauritius in May 2015. It is also recognized by Bank of Mauritius as External Credit Assessment Institution (ECAI) from May 2016. CRAF is also licensed by Capital Markets Authority of Kenya to operate as a Credit Rating Agency in Kenya. CRAF intends to expand across other geographies in Africa with Mauritius as its hub of operations. With an equitable position in the Mauritius capital market, CARE Ratings (Africa) Private Limited provides a wide array of credit rating services that help corporates to raise capital and enable investors to make informed decisions backed by knowledge and assessment provided by the company.

CRAF's shareholders are CARE Ratings Limited, African Development Bank, MCB Equity Fund and SBM (NFC) Holdings Limited.

CRAF gets its technical support in the areas such as rating systems and procedures, methodologies, etc. from CARE Ratings Limited on an ongoing basis. CARE Ratings Limited, with an established track record of rating companies over almost three decades, follows a robust and transparent rating process that leverages its domain and analytical expertise backed by the methodologies congruent with the international best practices.

CRAF's Rating Committee consist of full-time members comprising of Senior Rating officials from CARE Ratings Limited and a panel of experienced professionals from Mauritius and African Development Bank.

CRAF has had a pivotal role to play in developing bank debt and capital market instruments including MMIs, corporate bonds and structured credit.

Disclaimer:

CARE Ratings (Africa) Private Limited ("CRAF")'s ratings are opinions on the likelihood of timely payment of the obligations under the rated instrument and are not recommendations to sanction, renew, disburse or recall the concerned bank facilities or to buy, sell or hold any security. CRAF's ratings do not convey suitability or price for the investor. CRAF's ratings do not constitute an audit on the rated entity. CRAF has based its ratings/outlooks on information obtained from sources believed by it to be accurate and reliable. CRAF does not, however, guarantee the accuracy, adequacy or completeness of any information and is not responsible for any errors or omissions or for the results obtained from the use of such information. Most entities whose bank facilities/instruments are rated by CRAF have paid a credit rating fee, based on the amount and type of bank facilities/instruments. CRAF may also have other commercial transactions with the entity. In case of partnership/proprietary concerns, the rating /outlook assigned by CRAF is, inter-alia, based on the capital deployed by the partners/proprietor and the financial strength of the firm at present. The rating/outlook may undergo change in case of withdrawal of capital or the unsecured loans brought in by the partners/proprietor in addition to the financial performance and other relevant factors. CRAF is not responsible for any errors and states that it has no financial liability whatsoever to the users of CRAF's rating. CRAF's ratings do not factor in any rating related trigger clauses as per the terms of the facility/instrument, which may involve acceleration of payments in case of rating downgrades. However, if any such clauses are introduced and if triggered, the ratings may see volatility and sharp downgrades.
